

AWARENESS DAY EVENT, for Chemtrails

PURPOSE: for people who choose to use their Constitutional right to gather and free speech about their concerns about the condition of the air we breathe, the food we intake and the water we drink, and the health of ourselves and our animals, that are being effected by CHEMTRAILS.

I will commit myself to my promise to my family to fight for blue skies back.

DEFINITION: and other terms, **GEOENGINEERING, WEATHER MODIFICATION**

LAWS: PUBLIC LAW 105—85—NOV. 18, 1997: TitleX Section 985 USE OF HUMAN SUBJECTS FOR TESTING OF CHEMICAL OR BIOLOGICAL AGENTS , 111 STAT 1629 105th Congress

PATENTS: US Patent # 4686605, <http://www.google.com/patents/US4686605>

US Patent # 7413145, <http://www.google.com/patents/US7413145>

I would like to reach folks that are already interested in the weather, but more so, beyond them. There are people like me and us, that either work outside as a landscaper, farmer, gardener, cattle, horses and many other things that cause us to be out of doors. I believe we naturally look up every day to see what the weather is going to bring. Well, lately it has brought mostly devastation and ruin. People are seeing crops and small gardens failing to thrive. Geoengineered storms have wreaked havoc across the US and they are claiming it's helpful and or "to prevent global warming." Well, many thousands of do not agree, and want it stopped. If you are not an outdoor person this is still important for you to take notice. You are breathing the same everyone else is. Your children or pets still play out in the same snow and or rain. The chemtrail program is affecting ground water, drinking water for some people, crops, and gardens. Water and soil samples have already proven this. There are many side effects from the chemtrail program. Here is a small list of some of the ingredients that dispersal planes are spraying on our communities every single day. Symptoms and reactions vary, but are always negative, affecting the immune system, and once that is faltering, you will pretty much catch and flu or bug coming down the pike. (Notice an increase in the flu intensity? Notice an increase in flu spread and duration? Visit your local ER, they will tell you all about it).

CHEMICALS dispersed : aluminum, barium, strontium, mercury, algae, mold, biological etc.,

SYMPTOMS include: headaches, sinus & respiratory distress/upset, ears ringing, heart stress, sudden illness when never sick before, joint pain, cancer, more can be found at GlobalSkyWatch. Some folks seem more sensitive than others to these chemicals depending on their immune system condition and exposure. Please research these sites for yourself. Look up at the sky, watch for the dispersal planes to appear within 48 hours of every single storm. Wake up, Stand up, Speak up.
